

Luna says lawmakers have evidence of 'interdimensional beings'

by [Ashleigh Fields](#) - 08/13/25 10:53 PM ET

Rep. [Anna Paulina Luna](#) (R-Fla.) said during a Wednesday podcast episode with [Joe Rogan](#) that lawmakers have seen evidence of "interdimensional beings."

"I think that they can actually operate through the time spaces that we currently have," Luna said during the podcast.

"And that's not something that I came up with on my own. That's based on stuff that we've seen. That's based on information that we've been told," she added.

In February, Luna and Rep. [James Comer](#) (R-Ky.) sent letters to Secretary of State [Marco Rubio](#), Secretary of Defense [Pete Hegseth](#) and CIA Director [John Ratcliffe](#) requesting a briefing on all records in their possession related to unidentified anomalous phenomena, with the ultimate goal of "deliver[ing] transparency to the American people."

She says through investigations, she's discovered otherworldly information.

"Based on testimony — that would be based on witnesses that have come forward. But what I can tell you is just we're told that they were that, they've seen things," Luna told Rogan.

"And what I can tell you without getting into classified conversations is that there have been incidences that I believe were very credible — people have reported that there have been movement outside of time and space," she continued.

Luna said she's never seen a portal or a spaceship but was searching for documentation that could lead to more evidence of life beyond humans.
