

Earthquakes and Wars Updates Judgements!

Mark 13:7 And when ye shall hear of wars and rumours of wars, be ye not troubled: for *such things* must needs be; but the end *shall* not be yet. **8** For nation shall rise against nation, and kingdom against kingdom: and there shall be earthquakes in divers places, and there shall be famines and troubles: these *are* the beginnings of sorrows.

Tsunami warning issued after 7.4 magnitude quake off Mexican coast

A powerful magnitude 7.4 earthquake struck off the coast of Mexico's southern state of Chiapas, triggering a tsunami warning.

The quake, which struck near the Mexican city of Puerto Madero, was at a shallow depth of 10 km, the U.S. Geological Survey (USGS) said. Witnesses said it shook buildings in neighbouring Guatemala.

Following the tremor, the US Tsunami Warning System issued a tsunami threat for the region.

The tremor was also felt in El Salvador, another Reuters witness said.

2 NATO Countries Warn Russia Preparing for Attack, Escalation

Western intelligence agencies are increasingly concerned that Russia may be preparing a limited hybrid operation targeting NATO's eastern flank, potentially involving the Baltic states or Poland.

Such a move, officials believe, could be an attempt to test the alliance's unity as the war in Ukraine enters a new phase.

According to reporting by The Guardian, intelligence officials from two NATO countries have warned that Moscow is considering a "provocation" rather than a full-scale military attack.

Japan: 7.2 magnitude earthquake hits northeastern region, injuring at least 10 people

4:50 PM – Thursday, June 25, 2026

An earthquake struck Japan's northeastern coast on Thursday, injuring at least ten people in northern prefectures of Aomori and Iwate, Japanese authorities reported.

The U.S. Geological Survey (USGS) initially measured it as a 6.9 magnitude, and the Japan Meteorological Agency (JMA) similarly called it a 6.9 before upgrading their tracking to a 7.2 magnitude. Additionally, some Japanese outlets have since reported that approximately 11 people have been injured as a result.

Fortunately, no life-threatening injuries or deaths have been reported.

Striking at 7:30 a.m. local time on Thursday, the quake shook dozens of towns across northeastern Japan and triggered mild tremors as far away as Tokyo. The hardest-hit area was Aomori Prefecture, which registered an “upper 6” on Japan’s 7-point seismic intensity scale — a level of shaking so severe it makes standing or walking impossible.

Back-to-back massive earthquakes rock Venezuela, ‘devastating’ estimated death toll

6:36 AM – Thursday, June 25, 2026

Two massive back-to-back earthquakes rocked Venezuela, with reports of collapsed buildings and high casualties.

Per media reports, Venezuelan acting President Delcy Rodríguez provided an update on Thursday morning that at least 164 people died and nearly 1,000 were injured. She had previously noted that the state of La Guaira, north of the capital city of Caracas, on the coast, was reported as the worst hit, with dozens of collapsed buildings.

The foreshock, a 7.2 magnitude earthquake, occurred at 6:04 p.m. local time on Wednesday, originating in the north of the country, and was followed just 39 seconds later by the mainshock of 7.5, according to the United States Geological Survey (USGS).

Its early estimate put the single most likely statistical outcome of the quakes causing at least 10,000 deaths, at 42%. It also predicted heavy economic losses for the country, ranging from between 1% to 7% of Venezuela’s gross domestic product (GDP).

1 Dead After 6.3 Earthquake Rocks China's Qinghai

A magnitude 6.3 earthquake hit the northwestern Chinese province of Qinghai on Tuesday, killing at least one person and injuring four, as rescuers rushed to the site in search of trapped survivors.

The quake struck a high-altitude area in the prefecture of Haixi in Qinghai at a depth of 10 km at 5:06 p.m. Beijing time on Tuesday, the China Earthquake Networks Centre said.

Initial checks showed transport, communication, water and power lines near the epicenter were operating normally, local newspaper Qinghai Daily said late on Tuesday.

Massive 7.8 magnitude Philippines earthquake kills 32 and sparks terrifying tsunami

A massive 7.8 earthquake struck Mindanao in the southern Philippines leaving at 32 people dead and a terrifying tsunami.

The tremor also injured more than 200 others mostly in damaged buildings before sending a 1-meter (3-foot) tsunami into nearby coasts. The [quake](#) struck around 11:38 p.m. UTC Sunday, prompting the Pacific Tsunami Warning Center to issue [the warning for several countries](#) across the western Pacific. According to the PTWC, hazardous tsunami waves are possible and could affect parts of the Philippines, Indonesia, Palau, Yap, Taiwan, and Papua New Guinea within the next 3 hours.

According to the agency, the earliest projected arrivals are in coastal areas near the earthquake zone in the southern Philippines and eastern Indonesia, shortly after midnight UTC. Reports say that Davao, the largest city in the Philippines, could see the [first wave as early as 12:08 a.m.](#)

Earthquake cluster rattles West Coast near mega-tsunami danger zone

Three earthquakes rattled the U.S. West Coast on Wednesday, serving as another reminder that one of North America's most dangerous seismic zones lies just offshore.

The strongest of the trio struck off the southern Oregon coast, where the [U.S. Geological Survey reported a magnitude-5.7 earthquake approximately 100 miles west of Pistol River](#). The quake occurred at a depth of roughly 10 kilometers (6 miles) within the offshore Blanco Fracture Zone, a geologically active area where several tectonic plates interact. According to the USGS and the National Tsunami Warning Center, no tsunami threat was generated by the event.

The Oregon quake was accompanied by two additional earthquakes elsewhere along the West Coast on the same day. While none caused significant damage or injuries, the cluster attracted attention because of its proximity to one of the most closely watched seismic regions in North America, let alone the entire world.

Magnitude 6.2 earthquake shakes southern Italy

Story by Greta Ruffino

A strong earthquake tremor was felt across much of southern Italy shortly after midnight on 2 June.

The National Institute of Geophysics and Volcanology (INGV) recorded a [magnitude 6.2 earthquake](#) with its epicentre out at sea off Calabria's Tyrrhenian coast, near Belmonte Calabro, in the province of Cosenza. The quake struck at a depth of 250 kilometres.

The tremor was strongly felt along the Tyrrhenian coast, but no damage has been reported so far. The earthquake was also felt in Naples and the Vesuvius area, as well as in several parts of Calabria, Basilicata, Puglia and Sicily.

A very shallow magnitude 4.5 earthquake just struck near Manokwari in western Indonesia — one more sharp

jolt as Pacific Ring of Fire activity stays elevated this week

A magnitude 4.5 earthquake rattled the coast near Manokwari, a city of roughly 190,000 on the Bird's Head Peninsula in Indonesia's Papua region, during the last week of May 2026. According to the [USGS event page for this earthquake](#), the quake struck at a depth of approximately 10 kilometers at 03:42 UTC, placing the rupture squarely in the upper crust and concentrating energy close to the surface. That shallow origin likely produced sharp, distinct shaking for residents closest to the epicenter. No reports of significant damage or injuries have surfaced, but the event adds to a busy stretch of seismic activity along the Pacific Ring of Fire that has kept communities across the western Pacific on edge

Retrieved May 25, 2026, from [A very shallow magnitude 4.5 earthquake just struck near Manokwari in western Indonesia — one more sharp jolt as Pacific Ring of Fire activity stays elevated this week](#)
