

Earthquakes and Wars Updates Judgements!

Mark 13:7 And when ye shall hear of wars and rumours of wars, be ye not troubled: for *such things* must needs be; but the end *shall not be yet*. **8** For nation shall rise against nation, and kingdom against kingdom: and there shall be earthquakes in divers places, and there shall be famines and troubles: these *are* the beginnings of sorrows.

Powerful quake rocks northern Italy: What you need to know

Story by Cassian Holt

A powerful tremor has rattled northern Italy, jolting residents from their routines and reviving long standing fears about the country's seismic vulnerability. The quake, centered near Fornace Zarattini, has been strong enough to be widely felt across the region and to prompt fresh scrutiny of how prepared communities really are for the next big I want to unpack what happened, how it fits into Italy's broader earthquake pattern, and what practical steps people in the affected areas should be taking now, from checking buildings to understanding the risks that extend from the Po Valley to volcanic zones further south.

Early morning quake jolts northern SLO County awake

Story by Cassian Holt

[Residents](#) across northern San Luis Obispo County woke to a sharp reminder that California never really sleeps. An early morning jolt, felt from farmhouses to freeway interchanges, rattled nerves and sent people reaching for phones and flashlights before dawn. While the shaking was brief and damage reports remained limited, it landed in a community already on edge from a string of recent quakes up and down the Central Coast.

6.2 magnitude earthquake detected in Japan, no tsunami warning issued

Story by Anthony Trotter

Multiple earthquakes, including one at 6.2 magnitude, struck western Japan late Tuesday morning local time, centered in Shimane Prefecture and neighboring Tottori Prefecture.

The initial quake hit at 10:18 a.m. JST, magnitude 6.2, at a depth of about 6 miles, registering upper 5 on Japan's seismic intensity scale. A second tremor followed shortly after, magnitude 5.1, registering lower 5. Long, swaying motion was widely reported, with additional aftershocks continuing through late morning. Japan's Japan Meteorological Agency says there is no tsunami risk, but warns that earthquakes up to upper-5 intensity could continue for about a week, with the highest risk in the next two to three days.
